### The wedi principle for new builds and renovations

The modular wedi system opens up a multitude of possibilities so that every bathroom and wet room can be individually designed. Whether it's a new build or a renovation, wedi offers perfectly coordinated products which can be combined with one another any way you like for every situation in the bathroom – from wedi Fundo shower systems and building systems through design elements and ready-to-install design surfaces to a wide range of system accessories.

### On the details in this price list

This price list applies to all deliveries from January 1st 2024, when all previous prices become invalid. All prices are non-binding recommended retail prices, subject to the applicable rate of VAT and potential surcharges. Prices are ex works, exclude packaging and are subject to change. You can find our terms of delivery and payment in our general terms and conditions (www.wedi.net/uk/terms-and-conditions/).

Changes may have been made to some products after the editorial deadline of this price list on 31.10.2023. There may be changes to designs or formats as well as to the scope of delivery of some items provided that these are deemed reasonable and of course, taking the interest of customers into consideration. The above data and information have been carefully checked. Changes to construction and design as well as errors and misprints are reserved.

# 01 | wedi Fundo<sup>®</sup> point shower systems

wedi provides all of the components required to create a sophisticated shower area with point drainage – from flush-to-floor shower elements through matching drains and grids to surface finishes – there are various designs, functions and formats to choose from. All wedi system components are compatible with one another, tested, approved, and 100% waterproof in the complete system - for long-lasting reliability with a manufacturer's warranty.

### Fundo Ligno<sup>®</sup> Plus

The Fundo Ligno Plus shower element, with outer edge thickness of just 23 mm has been especially developed for use in existing and new builds with wooden floors in combination with Fundo Top design surfaces.

It is adapted to the covering wood layer and as a result can be integrated into it wonderfully without cutting into floor joists or building up further height.

### Fundo Top<sup>®</sup> marble for Fundo Ligno<sup>®</sup> Plus

The seamless, large-format design surface in marble look not only offers modern design, but also the highest product and workmanship quality. With a proportion of more than 70% real marble and a structured matt surface, it looks particularly authentic. The required matching slope is already integrated into the thin and lightweight surface material that can be simply bonded to the Fundo shower element. The highlight: with the new frameless drain cover, the entire shower shines with a uniform look. Stylish, comfortable and contemporary.

### **System configuration**

wedi Fundo shower systems with point drainage provide all of the necessary, coordinated components which you need for the installation and sealing of flush-to-floor shower elements from wedi.

- Perfect for installation in or on screed and suspended timber floors
- In a square, rectangular, round, quarter circle or shell shape
- With central, offset or corner drain position
- Optionally with vertical or horizontal drainage
- Easy to install and seal with the appropriate wedi accessories
- Bespoke wedi Fundo elements are available on request

### **Complete system**

The complete system with point drainage has a drain integrated into the shower element in the factory. The matching drain grid and sealing sheet are already included in the scope of delivery.

Sealing of the complete system to the adjacent surfaces is done with the wedi Fundo sealing set, comprising wedi 520, wedi Tools sealing tape and wedi Tools sealing corners.

### **Classic system**

The classic system with point drainage consists of a wedi Fundo shower element and the matching drain, which is available separately in different versions. The scope of delivery for point drains always includes a standard wedi Fundo 1.1 drain grid. Designer drain grids are also available to order at an extra cost.

Sealing of the complete system to the adjacent surfaces is done with the wedi Fundo sealing set, comprising wedi 520, wedi Tools sealing tape and wedi Tools sealing corners.

### **Required system components**

System component	wedi product					
Shower element	wedi Fundo shower element with point drainage					
Drain	wedi Fundo point drain suitable for wedi shower elements with	wedi Fundo point drain suitable for wedi shower elements with point drainage				
	vertical DN 50 vertical DN 50 fire protection collar vertical DN 70 vertical DN 70 fire protection collar	horizontal DN 50	Mini Max horizontal, extra flat DN 40			
Sealing	wedi Fundo sealing set includes all components for the sealing	wedi Fundo sealing set includes all components for the sealing of joints between the wedi Fundo shower element and adjoining areas				
Installation material	wedi 320 universal tile adhesive					

### **Optional system components**

System component	wedi product
Sound insulation	wedi Nonstep ProS sound insulation mat*
	wedi Tools edge insulation strips for acoustic decoupling between the shower element and the wall
Accessories	wedi Fundo substructure set substructure element for height compensation
	wedi Fundo sloping board
	wedi Fundo designer drain cover
	wedi Fundo drain frame
	wedi Fundo drain substructure element suitable for Fundo point drains vertical/horizontal DN50 especially recommended for installation in suspended timber floors
	wedi Tools cut-resistant tape
	Fundo Top ready-to-use surface** tailor-made surfaces for wedi Fundo shower elements

<sup>\*</sup> When using the sound insulation mat, the installation height is increased by 9 mm.

\*\* When using the Fundo Top surface, the build-up height increases by the thickness of the surface material plus 1 mm adhesive layer thickness (wedi 610).

1.500 × 1.500 ×	90 mm	£ 96.67	073743012	4024125121316

- The Fundo substructure set is delivered as a kit. A mount height of 30, 60 or 90 mm is produced with the help of the two
  elements with different thicknesses. The 3-part drain mount precisely incorporates the various drains
  - The Fundo substructure set can easily be shortened to the necessary dimensions in length and width. The appropriate variant
    and number required depend on the dimensions of the Fundo shower element selected. Order 2 × substructure set 900 × 900
    mm for 1,800 × 900 shower elements, order 2 × substructure set 1,200 × 1,200 mm for 2,000 × 1,000 shower elements
  - Freely selectable drain position (depending on the Fundo shower element selected)
- The recess for the drain mount and drain pipe is created on the construction site
- **\*\***

scope of delivery

- 1 x EPS substructure element, 60 mm thick
- 1 × EPS substructure element, 30 mm thick
- 3 x drain mount for point and channel drains (vertical, horizontal, Mini Max)

full pallet quantity 10 units

- accessories
  - required: wedi Fundo shower element with linear drainage, wedi Fundo shower element with point drainage, wedi Fundo point or channel drain
  - optional: wedi 320 universal tile adhesive
  - not compatible: Fundo fire protection collar point drain

# 02 | wedi Fundo<sup>®</sup> Linear shower systems

wedi offers all components for the creation of a sophisticated shower area with stylish linear drainage, optionally with the drainage channel close to the wall, at a distance from the wall or at the centre. There is a selection of matching drains, height-adjustable channel covers and even surface finishes to choose from. All wedi system components are compatible with one another, tested, approved and 100% waterproof in the complete system - for long-lasting reliability with a manufacturer's warranty.

#### Fundo Riolito<sup>®</sup> Neo

The Fundo Riolito Neo is a floor-level wedi showerelement with three highlights: drain channel close to the wall, a continuous, even slope up to the channel and flexible adaptation to the room situation.

The shower element has the required slope already integrated. Thanks to the one-sided slope, the Fundo Riolito Neo enables almost seamless laying of large-format tiles in a wide range of thicknesses (5 - 25 mm) as well as the precisely fitting Fundo Top design surfaces.

#### Fundo Top<sup>o</sup> marble for Fundo Riolito<sup>o</sup> Neo

The new Fundo Top marble design surface offers modern design and the highest quality. With more than 70% real marble and an authentic matt finish, it gives the bathroom a unique aesthetic. The lightweight surface is easy to install and matches the wedi Fundo shower element perfectly. Thanks to the integrated gradient and frameless cover, it gives a harmonious look for the entire shower. Stylish, comfortable and contemporary.

### **System configuration**

wedi Fundo shower systems with linear drainage provide all of the necessary, coordinated components which you need for the installation and sealing of flush-to-floor shower elements from wedi.

- Perfect for installation in or on screed and suspended timber floors
- In a square and rectangular version
- With a short or long channel
- With the drain positioned close to the wall, at a distance from the wall or in the centre
- Optionally with vertical or horizontal drainage
- Easy to install and seal with the appropriate wedi accessories
- Bespoke wedi Fundo elements are available on request

#### **Complete system**

The complete system with linear drainage has a drain integrated into the shower element in the factory. The matching standard channel cover and sealing sheet are already included in the scope of delivery.

Sealing of the complete system to the adjacent surfaces is done with the wedi Fundo sealing set, comprising wedi 520, wedi Tools sealing tape and wedi Tools sealing corners.

#### **Classic system**

The classic system with linear drainage consists of a wedi Fundo shower element and the matching drain, which is available separately in different versions. The scope of delivery of the linear drainage does not include the channel cover, therefore this needs to be purchased separately.

Sealing of the complete system to the adjacent surfaces is done with the wedi Fundo sealing set, comprising wedi 520, wedi Tools sealing tape and wedi Tools sealing corners.

### **Required system components**

System component	wedi product					
Shower element	wedi Fundo shower element with linear drainage					
Drain	wedi Fundo channel drain suitable for wedi shower elements with	vedi Fundo channel drain uitable for wedi shower elements with linear drainage				
	vertical DN 50 vertical DN 50 fire protection collar	horizontal DN 50	Mini Max horizontal, extra flat DN 40			
Channel cover	wedi Fundo channel cover suitable for wedi Fundo linear drainage					
Sealing	wedi Fundo sealing set includes all components for the sealing of joints between the wedi Fundo shower element and adjoining areas					
Installation material	wedi 320 universal tile adhesive					

### **Optional system components**

System component	wedi product
Sound insulation	wedi Nonstep ProS sound insulation mat*
	wedi Tools edge insulation strips for acoustic decoupling between the shower element and the wall
Accessories	wedi Tools step-folded, sloped lip-end sealing tape preformed sealing corners for wedi Fundo shower elements with linear drainage
	wedi Fundo channel frame
	Fundo Discreto optical wall-drain attachment element
	wedi Fundo sloping board
	wedi Fundo slope profiles for optical slope compensation
	wedi Fundo substructure sets substructure elements for height compensation
	wedi Fundo channel drain substructure element suitable for Fundo channel drains vertical/horizontal DN500 particularly recommended for installation in suspended timber floors
	wedi Tools cut-resistant tape
	Fundo Top ready-to-use surface** tailor-made surfaces for wedi Fundo shower elements

<sup>\*</sup> When using the sound insulation mat, the installation height is increased by 9 mm.

\*\* When using the Fundo Top surface, the build-up height increases by the thickness of the surface material plus 1 mm adhesive layer thickness (wedi 610).

### Fundo Plano<sup>o</sup> Linea complete shower element • drain offset, close to the wall, DN 40

- The drainage of the Fundo Plano Linea range is integrated into the shower elements during the manufacturing process. A
  suitable drain cover and a sealing sheet for the pipe inlet area is included in the scope of delivery
  - The channel length determines the appropriate combination articles of the Fundo channel cover, channel frame or Fundo Discreto attachment element
  - absorption capacity: 0.40 Litre/Second
- <u>w</u>+

accessories

rectangular, channel length 800 mm	1.600 × 1.000 ×	25 mm	£ 826.93	075100203	4024125127189

- Fundo RioLigno was especially developed for use as a flush-to-floor shower with linear drainage on suspended timber floors.

  The 25 mm outer edge can be embedded into the wooden surface layer with no additional installation height and without forming a step. The channel area, reinforced downwards, disappears between the wooden beams with this installation method
  - The channel length determines the appropriate combination articles of the Fundo channel cover, channel frame or Fundo Discreto attachment element

accessories

- required: wedi Fundo channel cover, wedi Fundo channel drain
- optional: wedi Fundo sealing set, wedi Tools sloped lip-end sealing tape, wedi Fundo slope profiles, Fundo Discreto, wedi Fundo channel frame

scope of delivery

- 1 x Fundo RioLigno shower element
- 2 × frame clamping piece

### Fundo Riofino<sup>®</sup> shower element • square, drain central, channel length 300 mm

length × width × th	nickness	price	order no.	GTIN
900 × 900 ×	50 mm	£ 445.60	073737312	4024125102520
1.000 × 1.000 ×	50 mm	£ 486.48	073737311	4024125102506
1.200 × 1.200 ×	50 mm	£ 505.80	073737313	4024125102544

• The channel length determines the appropriate combination articles of the Fundo channel cover and Fundo channel frame

- accessories
  - required: wedi Fundo channel drain, wedi Fundo channel cover
  - optional: wedi Fundo channel frame
- scope of delivery
  - 1 × Fundo Riofino shower element
  - 1 × frame clamping piece

#### Fundo Riofino<sup>®</sup> shower element - rectangular, drain central, channel length 300 mm

**BRAND OF** THE CENTURY

• The channel length determines the appropriate combination articles of the Fundo channel cover and Fundo channel frame

accessories

- required: wedi Fundo channel drain, wedi Fundo channel
- optional: wedi Fundo channel frame

scope of delivery

- 1 × Fundo Riofino shower element
- 1 × frame clamping piece

full pallet quantity 10 units

#### wedi Fundo° substructure set • square

for Fundo shower elements with point or linear drainage

length × width × th	ickness	price	order no.	GTIN
900 × 900 ×	90 mm	£ 72.20	073743010	4024125121286
1.200 × 1.200 ×	90 mm	£ 84.44	073743011	4024125121309
1.500 × 1.500 ×	90 mm	£ 96.67	073743012	4024125121316

- The Fundo substructure set is delivered as a kit. A mount height of 30, 60 or 90 mm is produced with the help of the two elements with different thicknesses. The 3-part drain mount precisely incorporates the various drains
  - The Fundo substructure set can easily be shortened to the necessary dimensions in length and width. The appropriate variant and number required depend on the dimensions of the Fundo shower element selected. Order 2  $\times$  substructure set 900  $\times$  900 mm for 1,800  $\times$  900 shower elements, order 2  $\times$  substructure set 1,200  $\times$  1,200 mm for 2,000  $\times$  1,000 shower elements
  - Freely selectable drain position (depending on the Fundo shower element selected)
- The recess for the drain mount and drain pipe is created

scope of delivery

- on the construction site
- 1 x EPS substructure element, 60 mm thick

accessories

- 1 × EPS substructure element, 30 mm thick
- required: wedi Fundo shower element with linear drainage, wedi Fundo shower element with point drainage, wedi Fundo point or channel drain
- 3 x drain mount for point and channel drains (vertical, horizontal, Mini Max)
- optional: wedi 320 universal tile adhesive
- full pallet quantity 10 units
- not compatible: Fundo fire protection collar point drain

\*Optiona

#### wedi Fundo° channel drain substructure element • square

for Fundo channel drains

240 × 240 × 85 mm <b>f 63.05</b> 073732091 4024125128841	length × width × thickness	price	order no.	GTIN
	240 × 240 × 85 mm	£ 63.05	073732091	4024125128841

- Particularly recommended for use in suspended timber floors (e.g. for installation of Fundo RioLigno). For secure and precise support of the drain body under Fundo shower elements
  - This element can be shortened by up to 20 mm all round
- accessories
  - required: wedi Fundo channel drain, DN 50
  - optional: Fundo channel drain Mini Max, DN 40
  - not compatible: Fundo channel drain fire protection

#### wedi Fundo° sloping board • rectangular

for Fundo Riolito, Riolito Neo, Riofino

# 03 | wedi design and shape

wedi design elements in a wide variety of shapes offer unlimited design possibilities. Whether benches of all types, loungers or plumbing and bathroom furniture – the wide variety of designs allow for the creation of stylish and modern bathroom and wellness areas. Perfectly tailored to the wedi system, the wedi Top Line offers seamless design surfaces in place of traditional tiling as an optional surface finish.

### wedi Sanoasa° bench 1

Thanks to the clever design, both the seat and the support element of the wedi Sanoasa bench 1 can be positioned and adjusted in shape and length as desired. The straight edge makes it easy to tile and ensures a flush appearance.

As a design variant, the seat can also be installed slightly overhung and the Fundo Discreto optical wall drain element can also be integrated in order to implement individual design ideas.

# wedi Top<sup>®</sup> Wall marble design surfaces

The new seamless, large-format wedi Top Wall marble surface offers modern design with a natural marble look. The material is made of over 70% real marble and the design look particularly authentic thanks to the structured, matt surface.

The panels are only 4 mm thick and lightweight, which facilitates easy handling and assembly. At 2600 mm tall, they can easily cover the entire wall height. The material is ready for immediate use. Stylish, comfortable and contemporary.

### wedi Top° Wall ready-to-use surface • natural stone look, mineral and vinyl composite material, stone grey

i • High-quality, seamless, anti-bacterial surface made from mineral and vinyl composite material for cladding a wide variety of even surfaces, such as wedi building boards, wedi Subliner membranes or tiles

- Adhesion is done with wedi 610 adhesive sealant
  - can be cut and shortened on site

# 04 | wedi building systems

The wedi building board forms the basis for the versatile wedi building systems and is available in a variety of versions: in small or large size for floor and wall applications, as a pre-grooved variant to create curved structures and in the form of functional elements, e.g. for shelf and niche solutions and for the cladding of pipe connections and WC dry wall installations. All variants are 100% waterproof and can be tiled directly. They combine light weight with high stability, and are part of the certified modular wedi system.

#### wedi Sanwell° shower wall module

The wedi Sanwell shower wall module is suitable for installing on the existing substrate or as a freestanding shower partition and is available in various thicknesses and widths. Depending on the initial situation, factory -integrated technical components can be positioned individually at the appropriate height for each customer

The pre-installed and sealed cold and hot water pipes as well as the Hansgrohe iBox\* for over 200 flush-mounted fittings guarantee a simple, quick and safe installation.

#### wedi PreLine® building board

The wedi PreLine is a fully prepared building board element for easy installation of hot water heating systems. Thanks to its strong insulation properties, it promotes a balanced heat distribution across the entire space. The element can be directly tiled, saving the time-consuming installation of screed and reducing the construction height of the floor structure to a very minimum (from 30 mm). The wedi PreLine is therefore particularly suitable for refurbishment and renovation projects and is available in three different thicknesses.

- 1 × extension collar wall
- 1 × wedi 610 adhesive sealant, cartridge

#### Fundo Nautilo wall element - shell-shaped, cement coating

for Fundo Nautilo shower element

length × width × height	price	order no.	GTIN
1.850 × 1.475 × 2.015 mm	£ 3,375.46	041708000	4024125417082

- ☐ The Fundo Nautilo wall element can be installed as an entry on the right or as an entry on the left
  - Please observe the notes on tiling
- scope of delivery
  - 1 × wall segment type A
  - 2 × wall segment type B
  - 4 × wall segment type C
  - 1 × wall segment type D
  - 7 × spring
  - 2 x wedi Tools joint reinforcement tape, self-adhesive,
     25 m
  - 6 × wedi 610 adhesive sealant, cartridges

## Fundo Nautilo<sup>®</sup> Libero wall element • shell-shaped, cement coating

for Fundo Nautilo shower element

length × width × height	price	order no.	GTIN
1.850 × 1.475 × 2.015 mm	£ 3,934.05	041708002	4024125001885

- 🚆 🔹 The Fundo Nautilo Libero can be positioned anywhere in 🔛 the room
  - The Fundo Nautilo wall element can be installed as an entry on the right or as an entry on the left
  - Please observe the notes on tiling

- scope of delivery
  - 1 × wall segment type B
  - 4 × wall segment type C
  - 1 × wall segment type D
  - 1 × wall segment type E (with reinforcement for fittings and shower head)
  - $1 \times$  wall segment type F (with reinforcement for installing the shower rail)
  - 1 × wall segment type G
  - 1 × inspection board, building board 40 mm

  - 2 × wedi Tools joint reinforcement tape, self-adhesive, 25 m
  - 7 × wedi 610 adhesive sealant, cartridges

#### wedi Fundo<sup>®</sup> glass swing door • aluminium / tempered glass

for Fundo Trollo, Trollo Libero

length × width × thickness	price	order no.	GTIN
1.990 × 558 × 100 mm	£ 2,053.04	608001100	4024125091169

The glass door can only be mounted after tiling

- scope of delivery
- 1 × glass door
- 1 × chrome-plated doorknob
- 2 × high gloss anodised aluminium wall connection profiles
- 1 × stop rail
- 1 × sealing and protection profile
- 1 × silicone
- 14 × screws

delivery time approx. 6 – 8 weeks ex-works

# 05 | wedi system accessories

Quick, high-quality with guaranteed reliability – the versatile range of accessories from wedi offers certified components of wedi sealing systems as well as practical system aids for adhesion and installation. From the tried and tested wedi 610 adhesive sealant through fleece-backed sealing membranes and corners to the comprehensive wedi Fundo sealing set for all professional connections and joints in the shower. All products are perfectly coordinated and easy and quick to install.

#### wedi 610° adhesive sealant

As a versatile single component adhesive sealant, the wedi 610 is ideal for the simple, secure and waterproof joint connection between wedi building boards in just one easy step.

The combination of wedi building boards and wedi 610 has an ETA approval for highly stressed areas.

Solvent-, silicone- and PCP-free

# wedi Tools° shower trays sealing set

The wedi shower tray sealing set has been especially developed to ensure reliable sealing of shower trays of all types. This set is suitable for a variety of materials such as acrylic, resin or ceramic.

# **Sealing in the wedi system**

#### The right solution for every requirement

Sealing is a key theme in the building and renovation of bathrooms, in particular because of the interaction of various trades. That's why wedi has developed its own sealing concept. The sealing details include edge joints on walls and floors, expansion and contraction joints, transitions to the shower area and all types of intersections. wedi offers the right sealing system for every purpose. Tested, approved, perfectly coordinated and quick and easy to implement.

wedi sealing systems for wet rooms are tested and certified in accordance with national and international standards. Whether it is CE labelling or DIN standards – both the individual products and the complete system structures from wedi are thoroughly tested in accordance with the strictest quality and safety criteria. The result: lasting reliability in the system.

# **Types of surface sealing**

No.	Area	Water impact (in accordance with DIN 18534-1)	Waterproofing type	Recommended sealing systems
1	Wall surfaces	moderate (W1-I)	panel type seal	wedi building boards
	in showers		panel type seal	wedi Vapor 85
			liquid seal	wedi 520 flexible sealants
			sheet type seal	wedi Subliner Dry
			sheet type seal	wedi Subliner Dry & Flex
2	Partition shower wall	moderate (W1-I)	panel type seal	wedi building board, as a partition wall from 50 mm
3	Flush-to-floor showers	high (W2-I)	panel type seal as a shower element with drain	wedi Fundo shower elements
4	4 Wall surfaces above bathtubs		panel type seal	wedi building boards
			panel type seal	wedi Vapor 85
			liquid seal	wedi 520 flexible sealants
			sheet type seal	wedi Subliner Dry
			sheet type seal	wedi Subliner Dry & Flex
5	Floors in rooms without	moderate (W1-I)	panel type seal	wedi building boards
	high exposure to water from the shower area	gh exposure to water om the shower area	liquid seal	wedi 520 flexible sealants
	nom are shower area		sheet type seal	wedi Subliner Dry
			sheet type seal	wedi Subliner Dry & Flex
	Floors in rooms with	high (W2-I)	panel type seal	wedi building boards
	flush-to-floor showers		liquid seal	wedi 520 flexible sealants
			sheet type seal	wedi Subliner Dry
			sheet type seal	wedi Subliner Dry & Flex

National standards, data sheets and guidelines should always be observed.

# **Components of wedi sealing systems**

wedi sealing system	System components

### 06 | Good to know

wedi offers more. On the following pages you will find a compact overview of technical information and all of the services wedi offers its customers: from project business through commitment to reliability and standards to the voluntarily extended manufacturer's guarantee. Real added value for maximum peace of mind.

### **Configure. Order. Install.**

Implementing the customer's ideas requires craftsmanship and a special imaginative power. With the wedi shower configurator, you can assemble your customer's dream shower online any time and even adjust the configuration if new ideas come up during the creation process.

Another plus: the system not only suggest the suitable products for every installation situation but also prevents incorrect orders. Configure, order, get started!

www.wedi.net/uk/shower-configurator

### **Technical notes**

#### All technical information is available at www.wedi.net

The wedi world of systems contains a multitude of individual elements which can be variably used and modularly expanded. You can find various technical documents which give you an overview of the respective formats, dimensions and technical requirements, as well as internationally usable installation instructions and videos at www.wedi.net/uk/downloads/ so that you can plan efficiently and you are always on the safe side.

#### **Notes on floor construction**

#### **Parameters relevant for your planning**

Quite often, especially in renovation projects, the available construction heights are limited and for this reason, many suppliers aim to advertise with the lowest possible construction height specifications. This can be misleading and often results in incorrect calculation of the required floor height. As a responsible supplier, wedi always advertise the highest thickness of its floor elements so that clients are always on the safe side.

#### **Calculation of the floor construction height**

When planning a wedi floor-level shower, the floor construction height (without floor covering or adhesives) is calculated by adding the height of the wedi Fundo shower element (always advertised with its highest thickness at the outer edge) and the height of the corresponding drain body (vertical or horizontal). Where sound insulation is required, the height of the insulation mat must also be added.

### Notes on tiling: maximum tile sizes for round wedi elements

Size												
Radius	R 50	R 100	R 150	R 200	R 250	R 300	R 350	R 400	R 450	R 500	R 750	R 875
max. tile size	10 mm	20 mm	20 mm	20 mm	20 mm	50 mm	100 mm					

The radii of the wedi products can be taken from the respective technical drawings.

### wedi Fundo shower elements tiling examples

The tiling of wedi Fundo shower elements\* depends on both the respective basic format as well as the composition of the integrated slope, as shown by the following examples.

 $<sup>^{\</sup>star}$  Minimum 20 x 20 mm mosaic for barefoot access. Wheelchair accessible from 50 x 50 mm tile size.

### **Modular construction**

### Ready-to-assemble systems for designing and refurbishing

With its modular system components, wedi creates brand new opportunities for designing individual, on-trend bathrooms and wet rooms. Lightweight and at the same time enormously stable wedi modules allow for the realisation of almost anything from the floor to the ceiling and practically everything else in-between: freestanding or partially attached creative partitions, shower solutions, customised bathroom furniture or complete system solutions for spa and wellness areas for example.

Our individually made module components are always tested, load-bearing and 100 % watertight structures – easier, quicker and safer than any other conventional drywall designs. Each module is custom-made. The degree of prefabrication can be freely selected: from power cables and cold and warm water pipes built in at the factory and load-bearing reinforcements, cable ducts and empty conduits through to ready-to-use technical components and fittings. All custom-made items are assembled in the wedi factory and subjected to a thorough test before delivery.

### T-module used on three sides

A modular system for toilet, shower and wash basin incl. all technical components and reinforcements.

# Individual spa & wellness elements

#### **Pool & underwater structures**

The experienced wedi project team realises swimming pools, whirlpools and underwater elements, such as steps and benches, exactly according to the clients ideas and specifications. Due to the completely free shaping of all elements, countless design possibilities arise. If desired, recesses and feed-throughs can be incorporated at the factory, e.g. for on-site installation of massage jets or lighting technology. This reduces the assembly effort and increases the quality of the installation.

#### **Individual steam baths**

wedi offers countless options for designing a steam bath. From the choice of the cabin geometry through the design of the vapour coating on the roof, comfortable seating and bath furniture to the technical equipment and furnishings, a multitude of details can be planned and realised according to the client's requirements. Wall and roof elements can be coated in the factory, milled recesses for cables can be incorporated into the individual modules or lighting and sound technology can be integrated during the manufacturing process. Quick installation is guaranteed thanks to the accuracy of fit and the lightness of the materials from wedi.

# A real guarantee opposed to just a warranty

### The wedi quality guarantee

With the extended guarantee services on products and systems, wedi sets new standards in quality leadership. wedi offers not only a statutory warranty, but also a voluntary additional performance commitment in the form of the 10 year quality guarantee.

## We provide security

The CE labelling of the wedi products documents their tested and approved use as a sealing system for wet rooms.

Modular system solutions from wedi have a wide range of differing technical building approvals and test certificates.

The barrier-free wedi products have been tested, assessed and certified for their conformity by DIN CERTCO Gesellschaft für Konformitätsbewertung mbH.

The integrated wedi environmental management system is certified by the independent certification body GUTcert: certified in 2019 in accordance with ISO 14001.

Systems from wedi are labelled in accordance with the French VOC regulations. A+ stands for exceptionally low emission, non-hazardous product systems.

The wedi product systems have been tested and approved in France by the Centre Scientifique et Technique du Bâtiment (CSTB), a technical and scientific institute which deals with issues relating to construction quality and building safety.

The wedi product systems satisfy the construction guidelines and regulations that are applicable in England, Wales, Northern Ireland and Scotland.

The compliance of wedi products and systems with national standards and the construction regulation requirements is tested and approved for the US market by the US testing institute ICC-ES.

The MK test seal qualifies wedi products for use in Denmark in accordance with the country-specific quidelines, norms and standards.

The Norwegian test seal, which corresponds to the European requirements, certifies the high technical quality of the wedi product systems.

xpert Services

The wedi quality management system and the high product quality are indicated by the Finnish eurofins test seal.

The wedi construction systems are labelled with the leading Finnish emissions classification. In this context, M1 stands for the highest quality.

## Social and environmental responsibility

### Certified environmental management system in accordance with ISO 14001

Environmental responsibility is actively practised at wedi. From the procurement of the raw materials through development and production to sales and the in-house wedi logistics – wedi is committed to complying with all relevant environmental provisions and continuously improving all processes with regard to sustainability and conservation of resources. Coordination of and compliance with the strict guidelines is done through the company wide environmental management system.

The effectiveness of the holistic wedi environmental management system is attested to here by the independent certification body GUTcert: wedi was certified in accordance with the internationally recognised environmental standard ISO 14001 in 2019. Here, compliance with the standards is not only reviewed annually, it is also continuously managed and monitored by appropriate officers in the company. The wedi products and processes should thus also support customers, partners and suppliers with the sustainable handling of energy and environmental resources.
